Around the World 206 Times. An eminent physician has made a curious mathematical calculation in giving the workings of the human heart in mileage. He shows that in a lifetime of 84 years the blood as it passes through the heart is

The fact can be readily understood that one in four has a weak heart, also the importance of treating that organ as soon as its affected condition is in the slightest degree manifested

Reader, if you have any reason whatever for believing your heart to be affected, you should attend to it at once. Do not hesitate. Many persons who die suddenly of this disorder have never suspected its presence. Joseph Boody, Pierpont, N. Y., writes: "Three years ago I began to have difficulty in breathing, palpitation of the heart set in, and my limbs and ankles were badly swollen. Physicians said I could not live a week. I began using Dr. Miles' New Heart Cure; the first bottle greatly relieved me, and, although 76 years of age, the several bottles I took altogether so immensely benefited me that I am a new man. I cheerfully recommend this remedy."

bottles I took altogether so immensely benefited me that I am a new man. I cheerfully recommend this remedy."

"While suffering from a severe attack of heart disease, and expecting to die, physicians having afforded me no relief. I was induced to buy some of Dr. Miles' New Heart Cure. Every dose lifted me right up, and it seems as though it would almost raise the dead. I would willingly fill the New Heart Cure bottles with gold for the magnificent remedy they contain, if I could not get them on other terms."—S. A. Hull, Franklin, N. Y.

"For 20 years I was seriously troubled with heart disease and nervous prostration, the latter affecting the sciatic nerve of my left side. During that time I was treated by many prominent physicians, and sent hundreds of dollars away for medicines, all of which failed. Recently I began using Dr. Miles' New Heart Cure, and am now entirely free from my old complaints."
